The HO Union Pacific 4500 Turbine

In a turbine, intake air is compressed by spinning turbine blades and fed into combustion chambers, where fuel is added and ignited, as in a jet engine. The hot exhaust gases spin the blades of another turbine that powers one or more generators, which produce electricity to power diesel-type traction motors. Compared with diesels of the period, GE's turbine put three times as much power in one locomotive, had significantly fewer moving parts, and did not vibrate like a diesel. The major drawback was a voracious appetite for fuel.

Featuring the same detailing fidelity and features of its bigger brother, the Veranda - MTH's first Union Pacific Turbine - the 4500 comes outfitted with variable intensity smoke, operating Mars light, built in DCC decoder plug, die-cast metal construction, twin flywheel-equipped motors, and four traction tires to provide pulling power in a model that rivals the prototype.

AVAILABLE IN

- Item No. **80-2126-0** Union Pacific 4500hp Gas Turbine **(DCC Ready)** (Cab No. 52)
- Item No. **80-2126-1** Union Pacific 4500hp Gas Turbine **with Proto-Sound 3.0** (Cab No. 52)
- Item No. **80-2127-0** Union Pacific 4500hp Gas Turbine **(DCC Ready)** (Cab No. 57)
- Item No. **80-2127-1** Union Pacific 4500hp Gas Turbine **with Proto-Sound 3.0** (Cab No. 57)

- Item No. **80-2128-0** Union Pacific 4500hp Gas Turbine **(DCC Ready)** (Cab No. 59)
- Item No. **80-2128-1** Union Pacific 4500hp Gas Turbine **with Proto-Sound 3.0** (Cab No. 59)
- Item No. **80-2129-0** Union Pacific 4500hp Gas Turbine **(DCC Ready)** (Cab No. 55)
- Item No. **80-2129-1** Union Pacific 4500hp Gas Turbine **with Proto-Sound 3.0** (Cab No. 55)

DCC Ready = € 349.95

Proto Sound = € 429.95
